

Brief Summary of the Invention

This object is achieved through providing a device for making the commercial trailer more visible. The invention is called a commercial exterior magnetic neon lighting system.

It is a device to enhance the present invention, the trailer, to provide more visibility at night and in inclement weather. It will also deter wrecks from occurring because the magnetic neon lighting system will surround the entire bed frame of the trailer. This system is designed to promote Highway Safety to make up coming vehicles more visible.
